

# AI Data Platform / Lakehouse

Bronze/Silver/Gold + Feature Store + MLflow-ready forecasting + Governance

## Project Question

Can a modern healthcare/public-sector lakehouse improve scalable AI analytics and forecasting workflows?

**Overview** Data Quality Forecasting Architecture

---

This dashboard summarizes a local lakehouse-style data platform.

Layers:

- Bronze raw events
- Silver cleaned records
- Gold certified analytics table
- Feature store
- ML forecasting output

## Gold Certified Dataset

|   | event_month | county      | program            | total_services | avg_risk_score | avg_social_need | total_prior_utilization | target_next_m |
